

# Yoga angels open my gift

## You need:

- > 2-4 game figures, depending on the number of participating players
- > 1 dice
- > and of course the prepared gifts for the game participants

## Game History:

Place your game figures at the start, the big Christmas stars at each corner of the game field. Now begin to roll the dice, the one who first rolls a 6 may start. Now go with your game figures in clockwise direction, move the rolled number along the "star path", if you get to the golden gift ribbon, you can pull in the direction of the golden mesh, but if you do not reach it directly, you just move on.

If you come outside on a golden star, then you may roll again, if you come to the "yoga angel" so you have to interrupt a round and perform the illustrated yoga exercise.

Within the circle, only the "Yoga-Angel" fields are to be executed, but not the white and golden star fields, these are considered as normal fields.

If a player arrives directly on the golden mesh in the middle, then he/she is presented with the gift and is allowed to unpack it. The other players continue to play until all have received and opened their gift.
