

## Game Instruction

### „Fire of love“

#### **You need:**

- 1 dice
- 2 game characters

Before the start of the game you clear what actions are to be performed on the heart fields, best to write it on a piece of paper. E.G. kiss the partner, embrace him/her ec.

#### **Important!**

Please choose only actions, which are accepted by both game partners, no malicious or deregistering actions, because it is a „love game“!

#### **Game history:**

Set the game characters to the start, one figure moves to the right side the other one to the left. Now you start to roll, who is the first to roll a 6, may begin. Now you go down the round heart play fields, depending on the number you have rolled.

If you come to a wing, then you go inside with your character to the red heart and must perform the previously agreed action, only then you may continue to roll the dice and move back out at the other wing to the heart fields.

If you finally reach the large heart with the arrow, you have to roll a six again to reach the "fire heart" in the middle.

The lovemaking begins but only when both players have arrived there. Now nothing stands in the way of your wishes and needs for a glowing, spirited lovemaking!

There are now boundaries for your love game.

I wish you lots of fun and a wonderful Valentines Day or evening!

Yours

Mirjam
