

Game instructions

You need:

- 1 dice
- 2-4 game figures, depending on the number of players
- per player can also be played with two or more game figures
- the downloaded and printed board game
- two post-it notes to note the number of goals per team

Playing time:

Twice 45 minutes with a little break in between, like a normal football game

Game History:

Set your game figures on the start, one team plays in the yellow field, the other in the red.

The first player rolling a six may start first. With the game figure you now move clockwise towards the goal, if you come to the field with the number 11, you can go to the player in the middle of the field and shoot a penalty if you dice a 6.

If a player comes onto the white field, he / she must skip a round or into the corner and may only move on to the next football-field towards the goal if he / she rolls a six.

If you get to the goal, you have scored a goal, so note this on a post-it you have stuck on the field, so you know the number of goals at the end of the game.

From the goal you go clockwise again towards the start, always in the circle.

The team that scored the most goals has won and must treat you a drink of your choice.

Game Variation:

You can also decide yourself which actions are to be executed on the numbered fields!

Have fun playing the game!
